

CPU PC Case 30cm 3/4 Pin PWM To Dual PWM Power Y-Splitter Adapter Cable Supply

MODEL NUMBER: PPT-194279433208

Highlights

- CPU PC Case 30cm 3/4 Pin PWM To Dual PWM Power Y-Splitter Adapter Cable Supply Easy to achieve 4Pin PWM temperature control fan in parallel, make full use of a limited number of motherboard 4Pin interface These 30cm extension cables allow you more choice in where you want to position your PWM or standard 3 pin fans inside your case. The wires are 30cm sleeved in black braiding with a 4 pin female connector at 1 end and splits to 2 4pin male connectors at the other.

Features

PWM version of the two-wire cable version of the snake

Protected fan interface

Easy to achieve 4Pin PWM temperature control fan in parallel, make full use of a limited number of motherboard 4Pin interface,

These 30cm extension cables allow you more choice in where you want to position your PWM or standard 3 pin fans inside your case.

The wires are 30cm sleeved in black braiding with a 4 pin female connector at 1 end and splits to 2 4pin male connectors at the other.

Please ensure your motherboard fan header is capable of the additional electrical load before purchasing any of these.

Please note - all the connectors are 4 pin connectors , but one of the connectors only has 3 wires. The reason for this is that the sensor wire is not used on this connector as if both fans were sending back information to the mobo it would not be able to understand

The information as both lots of information would be coming back through the single connector.

What happens is the fan with all 4 wires tells the mobo the information , and then the mobo controls the speed of both fans.

These do also have a cut out so you can use 3 pin fans instead of 4 pin if you wish.
